## Entry Requirements:

---

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

- A first or second class honours degree from a UK Higher Education Institution (HEI) or overseas equivalent in healthcare or medical sciences.
- A Medical Doctor or Healthcare Professional working in the healthcare industry e.g. NHS.
- Students will need to be working in the health context or have access to an appropriate placement, to comply with the requirements of some assessments within the course diet.
- If English is not an applicant's first language they will be expected to demonstrate a certificated level of proficiency of at least IELTS 7.0 (Academic level), unless the primary medical qualification has been taught and examined in English.
- Students may apply for Recognition of Prior Learning (RPL) subject to the guidelines set out by the University. RPL includes accreditation of prior certificated learning.
- A reference from a tutor who has supervised the applicants undergraduate or postgraduate studies (or equivalent).

## Distinctive Features of the Course:

---

The MSc Clinical Medicine is a vocationally focused academic programme, intended to prepare doctors from the NHS to become effective professionals in the workplace and to develop and improve existing skills and knowledge. It is particularly of interest to those who wish progress their career and become the healthcare leaders of the future. The course will offer the opportunity to engage with key CPD, but also to extend skills and personal development through the strands of self-awareness, application and innovation within their organisational context.

## Educational Aims of the Course:

---

The MSc Clinical Medicine (Leadership and Management) has been developed by practicing NHS Consultants and Health Academics in consultation with NHS Trust Partners. The course is designed for Medical Doctors and other Healthcare Professionals to develop and refine their clinical, leadership and research skills and develop understanding of effective teamwork and best practice. The speciality pathway (Leadership and Management) aims to enhance innovation, leadership, teaching, learning and research skills, thereby, facilitating personal and professional development and strengthening participants' ability to bring about positive change, solve problems effectively, and ensure patient safety.

The Leadership and Management Masters will be differentiated from the other Masters routes by its structure, by the demonstration of a deepening understanding of self-development as a clinical leader through the specific modules 7HR006 (Leading Transformational Change) and 7HR008 (Perspectives on Leadership) and within the Masters dissertation in module 7HW015.

This course has a strong emphasis on the evaluation and development of both clinical practice, research, and encourages participants to reflect critically on workplace experiences and learning. For participants, the course aims to provide a clear framework which supports CPD, recognition of prior learning and work based learning.

For Medical Doctors the course aims to provide a route in which they can take a different speciality, to change medical career routes and for Doctors seeking further accreditation of subspecialty expertise.

**Intakes:**

---

September  
January

**Major Source of Funding:**

Learning Outcomes:

---

PGCert Course Learning Outcome 1 (PGCCL01)

Demonstrate a systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of your academic discipline, field of study or area of professional practice with a conceptual understanding that enables the student: 1. to evaluate critically current research and advanced scholarship in the discipline. 2. to evaluate methodologies and develop critiques of them and, where appropriate, to propose new hypotheses.

---

PGCert Course Learning Outcome 2 (PGCCL02)

Demonstrate a comprehensive understanding of techniques applicable to your own research or advanced scholarship and ability to continue to advance your knowledge and understanding, and to develop new skills to a high level.

---

PGCert Course Learning Outcome 3 (PGCCL03)

Demonstrate originality in the application of knowledge, together with a practical understanding of how established techniques of research and enquiry are used to create and interpret knowledge in the discipline.

---

PGCert Course Learning Outcome 4 (PGCCL04)

Ability to deal with complex issues both systematically and creatively, make sound judgements in the absence of complete data, and communicate your conclusions clearly to specialist and non-specialist audiences.

---

PGCert Course Learning Outcome 5 (PGCCL05)

Demonstrate self-direction and originality in tackling and solving problems, and act autonomously in planning and implementing tasks at a professional or equivalent level.

---

PGCert Course Learning Outcome 6 (PGCCL06)

Demonstrate the qualities and transferable skills necessary for employment requiring: 1. the exercise of initiative and personal responsibility 2. decision-making in complex and unpredictable situations 3. the independent learning ability required for continuing professional development.

---

PGDip Course Learning Outcome 1 (PGDCL01)

Demonstrate a systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of your academic discipline, field of study or area of professional practice with a conceptual understanding that enables the student: 1. to evaluate critically current research and advanced scholarship in the discipline 2. to evaluate methodologies and develop critiques of them and, where appropriate, to propose new hypotheses.

---

PGDip Course Learning Outcome 2 (PGDCLO2)

Demonstrate a comprehensive understanding of techniques applicable to your own research or advanced scholarship and ability to continue to advance your knowledge and understanding, and to develop new skills to a high level.

---

PGDip Course Learning Outcome 3 (PGDCLO3)

Demonstrate originality in the application of knowledge, together with a practical understanding of how established techniques of research and enquiry are used to create and interpret knowledge in the discipline.

---

PGDip Course Learning Outcome 4 (PGDCLO4)

Ability to deal with complex issues both systematically and creatively, make sound judgements in the absence of complete data, and communicate your conclusions clearly to specialist and non-specialist audiences.

---

PGDip Course Learning Outcome 5 (PGDCLO5)

Demonstrate self-direction and originality in tackling and solving problems, and act autonomously in planning and implementing tasks at a professional or equivalent level.

---

PGDip Course Learning Outcome 6 (PGDCLO6)

Demonstrate the qualities and transferable skills necessary for employment requiring: 1. the exercise of initiative and personal responsibility 2. decision-making in complex and unpredictable situations 3. the independent learning ability required for continuing professional development.

---

Masters Course Learning Outcome 1 (MACLO1)

Critically apply knowledge, understanding and skills appropriate to a professional clinical role within the healthcare context.

---

Masters Course Learning Outcome 2 (MACLO2)

Critically debate the key concepts and theoretical positions that have been developed or are developing with a focus relevant to Leadership and Management.

---

Masters Course Learning Outcome 3 (MACLO3)

Critically reflect on the academic and practical application of theories and practices in the healthcare context with a focus relevant to Leadership and Management.

---

Masters Course Learning Outcome 4 (MACLO4)

Analyse theory and context, delivering findings through effective presentation media, to become a confident, digitally literate and innovative clinical professional utilising the skills derived from the learning within Leadership and Management.

---

Masters Course Learning Outcome 5 (MACLO5)

Critically appraise professional standards within the healthcare sector and recognise obligations to stakeholders, the profession and society professional utilising the skills derived from the learning within Leadership and Management.

---

Masters Course Learning Outcome 6 (MACLO6)

Synthesise relevant critical thinking through academic research completing an independent research project/dissertation at master's level within Leadership and Management.

### Overview of Assessment:

---

Module	Title	Course Learning Outcomes
7ED005	Mentoring: Critical Dialogue and Professional Practice	PGDCLO1, PGDCLO2, PGDCLO3, PGDCLO4, PGDCLO5, PGDCLO6
7HR008	Perspectives on Leadership	PGCCLO1, PGCCLO2, PGCCLO3, PGCCLO4, PGCCLO5, PGCCLO6
7HR010	The Reflective Practitioner	PGDCLO1, PGDCLO2, PGDCLO3, PGDCLO4, PGDCLO5, PGDCLO6
7HR014	People Development in Health Care	PGDCLO2, PGDCLO3, PGDCLO4, PGDCLO5
7HW012	Advanced Research Skills	PGDCLO1, PGDCLO2, PGDCLO3, PGDCLO4, PGDCLO5, PGDCLO6
7HW015	Research Dissertation	MACLO1, MACLO2, MACLO3, MACLO4, MACLO5, MACLO6
7HW025	Service Improvement Project Management	PGCCLO1, PGCCLO2, PGCCLO3, PGCCLO4, PGCCLO5, PGCCLO6
7HW109	Clinical Governance and Patient Safety	PGDCLO1, PGDCLO2, PGDCLO3, PGDCLO4
7WB005	Career and Personal Development Planning	PGCCLO3, PGCCLO4, PGCCLO5

### Teaching, Learning and Assessment:

---

The MSc Clinical Medicine (Leadership and Management), is a vocationally focused academic programme, intended to prepare Doctors and other Healthcare Professionals from the NHS to become effective professionals in the workplace and to develop and improve existing skills and knowledge. The course will offer the opportunity to engage with key CPD, but also to extend skills and personal development through the strands of self-awareness, application and innovation within their organisational context, delivered by specialists from the Faculties of Social Sciences and Education, Health and Wellbeing, together with medical educators in the NHS context.

The student experience on this course will be set within a mixture of independent, group and tutor-led study facilitated by a range of classroom, laboratory and blended learning support.

Students will work alone and in groups to develop problem-solving skills; and a systematic approach to research, applied within their specialist area of study. Reflective practice will be utilised to facilitate the application of knowledge and research skills in the light of personal experience and literature-based evidence in the context of vocational and research opportunities.

For the independent research element of the course, students will be allocated a personal supervisor who will support their learning in order to advance their knowledge and critical awareness of current research and contemporary issues, within their specialist area of study.

The core requirements of General Medical Council (GMC), Good Medical Practice (2013), require self-directed learners that are able to continually develop and maintain their professional skills at the highest level.

Accordingly summative assessments will be based on:

- Presenting evidence and attainment of agreed objectives and outcomes.
- Assignments
- Work Based Learning Projects
- A research dissertation.

### Assessment Methods:

---

At the University of Wolverhampton, a variety of modes of assessment will be used to support and test your learning and progress and to help you develop capabilities that are valued beyond your University studies and

into your working life. Your course may include a variety of assessment activities:

Written examinations (including online examinations, open and closed book examinations and quizzes)

Coursework (for example, essays, reports, portfolios, project proposals and briefs, CVs, poster presentation)

Practical (for example, oral and video presentations, laboratory work, performances, practical skills assessment)

In the final year of your undergraduate degree, and at the end of your postgraduate degree, you are likely to be expected to write an extended piece of work or research, such as a dissertation or a practice-based piece of research.

### Student Support:

---

Tutor support is available formally through individual appointments and at workshops. Electronic support is available via CANVAS and via email. Academic skills are developed through feedback on assessments and through individual appointments available with tutors. Workshops on thesis writing and viva voce examinations (including mock viva) will be made available.

### Employability in the Curriculum:

---

Our offer will match your needs as an ambitious medical professional by putting you at the centre of learning. The course delivers a clear, flexible academic framework, allowing you to progress via a route that supports your busy schedule as a practitioner and enables you to study at a suitable time.
