#### Teaching, Learning and Assessment:

---

This is a blended learning course with supportive and structured learning activities on Canvas supported by weekly in-class activities.

The online materials and face-to-face components of the module are integrated into a complimentary learning experience, which is both engaging and relevant, and resources are also accessible online. You are provided with a road map for studying each module in the form of a Homepage on Canvas. Each Canvas Homepage sets expectations and includes an orientation to help you understand how to successfully navigate the different online components of the module and prepare for the face-to-face meetings.

The structure of each Canvas topic follows a standard Business School layout to ensure consistency and familiarity for students and to help you navigate the different modules you will be studying. The Canvas Pages are used to present learning inputs and related activities with a narrative flow; content is structured into bite-sized inputs and activities of no more than 10-15 minutes, inclusive of any Panopto recorded slides. Each module Canvas page features a balance between interactive activities and short lecture inputs.

Regular opportunities are built in for formative feedback in-class and online. For summative assessments on modules with more than one tutor a marking rubric is used to ensure consistency and you will receive summative feedback via Canvas within four working weeks of submission. Your feedback may be written, oral or audio-visual in nature.

Blended learning lends itself to enquiry-based learning – this puts less emphasis on the lecture method of teaching and more on empowering you to solve problems, evaluate situations, research topics or apply

principles, which is more appropriate to business education. Face-to-face sessions are delivered in workshop mode with a set of task-based activities, which draw on the online content, and enable you to practically and critically explore the topic individually and in small groups.

Opportunities are built in for you to collaborate in peer-to-peer learning activities. This could include things such as small groups using a flipped learning approach, small group case study analysis, student-led assessment unpacking, group discussions, student-led seminars and problem-based learning.

The workshop and activity-based approach to learning enables multiple opportunities for formative feedback and self-diagnosis and testing to be built into the core content for each module, and there will be regular opportunities for you to engage in small group and one-to-one tutorials.

### Inclusivity

The modules are developed with Universal Design in mind, and to meet all accessibility standards. For instance, downloadable transcripts will be provided for all the videos – these may be created by Panopto and then edited into a useable text or may be scripted by the author in advance of the recording. We will also ensure that there are adequate descriptions provided all of graphs, charts, images etc used in PowerPoint slides included in the transcripts. There will also be alternative text for all graphics used in page, and we will ensure that all documents, PDFs etc are formatted to best be used by screen readers.

Case studies, examples and resources are drawn from a wide range of business cultures and contexts representing our diverse and international community.

### Assessment Methods:

---

At the University of Wolverhampton, a variety of modes of assessment will be used to support and test your learning and progress and to help you develop capabilities that are valued beyond your University studies and into your working life. Your course may include a variety of assessment activities:

Written examinations (including online examinations, open and closed book examinations and quizzes)  
Coursework (for example, essays, reports, portfolios, project proposals and briefs, CVs, poster presentation)  
Practical (for example, oral and video presentations, laboratory work, performances, practical skills assessment)

In the final year of your undergraduate degree, and at the end of your postgraduate degree, you are likely to be expected to write an extended piece of work or research, such as a dissertation or a practice-based piece of research.
