

Course Specification

Published Date:	14-Mar-2019
Produced By:	Oliver Jones
Status:	Validated

Core Information

Awarding Body / Institution:	University of Wolverhampton		
School / Institute:	Wolverhampton Business School		
Course Code(s):	EC005T01UV	Full-time	4 Years
	EC005T31UV	Part-time	8 Years
UCAS Code:	L110		
Course Title:	BA (Hons) Economics with Foundation Year		
Hierarchy of Awards:	Bachelor of Arts with Honours Economics Bachelor of Arts Economics Diploma of Higher Education Economics Certificate of Higher Education Economics University Statement of Credit University Statement of Credit		
Language of Study:	English		
Date of DAG approval:	01/Sep/2017		
Last Review:	2015/6		
Course Specification valid from:	2014/5		
Course Specification valid to:	2020/1		

Academic Staff

Course Leader:	Sharin Mcdowall
Head of Department:	Mr Andrew Groves

Course Information

Location of Delivery:	University of Wolverhampton
Category of Partnership:	Not delivered in partnership
Teaching Institution:	University of Wolverhampton
Open / Closed Course:	This course is open to all suitably qualified candidates.

Entry Requirements:

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

2017 Entry

- DD from A level
- BTEC QCF Extended Diploma grade PPP, BTEC QCF Diploma grade MP
- Pass Access to HE Diploma (Full Award)
- If you've got other qualifications or relevant experience, please contact [The Gateway](#) for further advice before applying.
- International entry requirements and application guidance can be found [here](#)

Other Requirements

Students must have studied a minimum of two years post GCSE level. However, it is expected that some applicants will be mature students with work experience, who wish to further their career development. These applicants will be processed through standard procedures, which may involve an interview as part of the process. Please see <http://wlv.ac.uk/mature> for further information.

Applicants who do not meet the entry requirements may be offered an alternative course.

Distinctive Features of the Course:

This programme provides a strong background in economics principles but also a knowledge and understanding of the recent developments in economics and the application of economic concepts to current issues. For example, a module on sustainability will be delivered jointly with staff from the Centre for International Development and Training. As part of your study of Economics you will develop skills in the organisation and analysis of statistical data, the interpretation of economic issues and the communication of economic ideas. These skills have been identified as being in demand by employers by a number of surveys, such as the one carried-out by the Economics Network.

You can develop the skills and knowledge that you need to study at undergraduate level, building on your strengths and working on your weaknesses, so that you can feel confident that by the end you are ready to commence a degree course, and to apply the skills to undertake the directed and independent learning which will help you to achieve your potential. This will allow you to embark on Level 4 study in an appropriate undergraduate discipline or combined award, confident that you have developed the skills and chosen the most relevant subject area(s) to specialise in, which will allow you to perform strongly at degree level and enhance your career aims.

Educational Aims of the Course:

Paul Samuelson describes Economics as the "study of how societies use scarce resources to produce valuable commodities and distribute them among different people." By learning about Economics you will see that there are various perspectives on how resources are allocated and that the different allocations will impact on social, political and business concerns.

This programme provides a strong background in economics principles but also provides a knowledge and understanding of the recent developments in economics and the application of economic concepts to current issues. For example, a module on sustainability will be delivered jointly with staff from the Centre for International Development and Training. As part of your study of Economics you will develop skills in the organisation and analysis of statistical data, the interpretation of economic issues and the communication of economic ideas. These skills have been identified as being in demand by employers by a number of surveys, such as the one carried-out by the Economics Network.

The BA (Hons) Economics course aims to provide students with knowledge and understanding of economics principles and concepts, and with the skills to apply these to changing economic and business environment. Through the use of a range of approaches, research techniques and learning forums the course intends to equip students with a range of personal and intellectual skills in preparation for a career in economics, business, and the public sector.

The graduates from this programme would have a range of skills that are in demand from employers, as demonstrated by the survey carried out by the Economics Network in 2014-15. The most significant of these are:

- A knowledge and understanding of economics
- Ability to analyse economic, business and social issues
- Organising, interpreting and presenting quantitative data
- Communication of economic ideas

Another survey of economics employers in the public sector identified the two dominant areas of work as producing briefing material and preparation of policy advice. The course will provide its graduates with the skills to effectively address these tasks.

A range of career opportunities will be available, covering regional, national and international organisations. This will include both public sector and not for profit sector organisations as demonstrated by the examples provided above. There would also be opportunities in the business sector in terms of market research, trade associations and lobbying organisations.

The degree can also be used as the basis for postgraduate study in the area of economics.

Learning Outcomes:

Foundation Year Course Learning Outcome 1 (UCCL01)

"Have factual, procedural and theoretical knowledge and understanding of a subject or field of work to

complete tasks and address problems that while well-defined, may be complex and non-routine."

Foundation Year Course Learning Outcome 2 (UCCL02)

Can interpret and evaluate relevant information and ideas

Foundation Year Course Learning Outcome 3 (UCCL03)

Are aware of the nature of the area of study or work

Foundation Year Course Learning Outcome 4 (UCCL04)

Are aware of different perspectives or approaches within the area of study or work.

CertHE Course Learning Outcome 1 (CHECLO1)

"Demonstrate knowledge of the underlying concepts and principles associated with your area(s) of study, and an ability to evaluate and interpret these within the context of that area of study"

CertHE Course Learning Outcome 2 (CHECLO2)

"Demonstrate an ability to present, evaluate and interpret qualitative and quantitative data, in order to develop lines of argument and make sound judgements in accordance with basic theories and concepts of your subject(s) of study."

CertHE Course Learning Outcome 3 (CHECLO3)

Evaluate the appropriateness of different approaches to solving problems related to your area(s) of study and/or work

CertHE Course Learning Outcome 4 (CHECLO4)

"Communicate the results of your study/work accurately and reliably, and with structured and coherent arguments"

CertHE Course Learning Outcome 5 (CHECLO5)

Demonstrate the qualities and transferable skills necessary for employment requiring the exercise of some personal responsibility

DipHE Course Learning Outcome 1 (DHECLO1)

"Demonstrate knowledge and critical understanding of the well-established principles of your area(s) of study, and of the way in which those principles have developed with an understanding of the limits of your knowledge, and how this influences analyses and interpretations based on that knowledge."

DipHE Course Learning Outcome 2 (DHECLO2)

"Demonstrate the ability to apply underlying concepts and principles outside the context in which they were first studied, including, where appropriate, the application of those principles in an employment context"

DipHE Course Learning Outcome 3 (DHECLO3)

"Demonstrate knowledge of the main methods of enquiry in the subject(s) relevant to the named award, and ability to evaluate critically the appropriateness of different approaches to solving problems in the field of

study"

DipHE Course Learning Outcome 4 (DHECLO4)

"Use a range of established techniques to initiate and undertake critical analysis of information, and to propose solutions to problems arising from that analysis"

DipHE Course Learning Outcome 5 (DHECLO5)

"Effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences, and deploy key techniques of the discipline effectively"

DipHE Course Learning Outcome 6 (DHECLO6)

"Demonstrate the qualities and transferable skills necessary for employment, requiring the exercise of personal responsibility and decision-making and undertake further training, developing existing skills and acquire new competences that will enable them to assume significant responsibility within organisations."

Ordinary Course Learning Outcome 1 (ORDCLO1)

Apply economic reasoning to a range of situations and appreciate that a number of alternative explanations and prescriptions may exist

Ordinary Course Learning Outcome 2 (ORDCLO2)

Demonstrate knowledge of some specialised areas in economics

Ordinary Course Learning Outcome 3 (ORDCLO3)

Demonstrate knowledge of the sources and content of economic data and evidence and appreciate what methods might be appropriately applied to the analysis of such data

Ordinary Course Learning Outcome 4 (ORDCLO4)

Demonstrate awareness of quantitative methods and computing techniques and show an appreciation of the contexts in which these methods and techniques could be used

Ordinary Course Learning Outcome 5 (ORDCLO5)

"Demonstrate knowledge of historical, institutional, international, social and environmental contexts in which specific economic analysis is applied"

Ordinary Course Learning Outcome 6 (ORDCLO6)

Communicate economic ideas to a variety of audiences

Honours Course Learning Outcome 1 (DEGCLO1)

Critically apply economic reasoning to a range of situations and appreciate that a number of alternative explanations and prescriptions may exist

Honours Course Learning Outcome 2 (DEGCLO2)

"Demonstrate knowledge in a number of specialised areas in economics, as well as an appreciation of the research literature in these areas"

Honours Course Learning Outcome 3 (DEGCLO3)

Demonstrate an understanding of the sources and content of economic data and evidence and of those methods that be applied appropriately to the analysis of such data

Honours Course Learning Outcome 4 (DEGCLO4)

Demonstrate proficiency in quantitative methods and computing techniques and know how to use these techniques and methods across a range of problems

Honours Course Learning Outcome 5 (DEGCLO5)

"Demonstrate an understanding of historical, institutional, international, social and environmental contexts in which specific economic analysis is applied"

Honours Course Learning Outcome 6 (DEGCLO6)

Effectively communicate economic ideas both verbally and in writing to a variety of specialist and non-specialist audiences

Teaching, Learning and Assessment:

The students' knowledge of economic concepts is developed throughout all three years of the programme. The programme as a whole will provide the students' with opportunities to develop skills relevant to the first graduate attribute identified under A Curriculum of Opportunity.

Skills relating to research methods and analytical techniques are initially developed at Level 4 in the modules 4EC005 Thinking like an Economist and 4FC001 Quantitative Analysis for Economics and Finance. The skills are used across the Level 5 modules, but are specifically deepened and widened in 5EC001 Economic Methods and Analysis. These specifically skill related modules will also introduced the students to a number of relevant software packages. The students will be able to demonstrate their research and analytical skills during the third year of the programme, specifically in in the project module 6EC004 Researching Topics in Economics. The modules discussed above will give the students opportunities to develop skill in relation to the second graduate attribute identified under A Curriculum of Opportunity.

The second and third years of the programme provides students with a number of opportunities to concentrate on specialised area of economics and will introduce them to relevant specialist literature. These modules will give the students an opportunity to develop skills related to the first graduate attribute identified under A Curriculum of Opportunity.

Interactive lectures, seminars and workshops will be used during face-to-face sessions to enhance learning and build up a peer support network that will provide additional support when collaborating online. CANVAS forums will be used for online collaboration where appropriate.

Learning and Teaching Methods:

This data indicates the proportion of time in each year of study that students can expect to engage in the following activities (expressed as a percentage for each level).

Level	Teaching	Independent	Placement
3	24	76	0
4	24	76	0
5	24	76	0
6	20	80	0

Assessment Methods:

This data indicates the proportion of summative assessment in each year of study that will derive from the following: (expressed as a percentage for each level).

Level	Written Exams	Practical Exams	Coursework
3	7	0	93
4	52	0	48
5	68	0	32
6	33	3	63

Student Support:

There are number of level of support available for learning.

Each student will be allocated a personal tutor. Personal tutors maintain regular communication (virtual and/or face-to-face) with each of their designated tutees. Follow up meetings are arranged with students who are not making satisfactory progress or who are at risk of withdrawal. Personal tutors assist students in their personal and academic development, planning and progression. As well as offer students advice and guidance to help students liaise with other staff and support facilities in their school and the University, including study skills support.

Course leader will monitor the academic and experiential quality of the Course through Award Boards, focus groups and other channels. Course leader also supports and direct students proactively on the Course, both collectively and individually, and respond to inquiries and requests from students with regard to the academic programme of study.

The Faculty Special Needs Tutor liaises with the Student Enabling Centre (SEC) regarding provision for specific disabled students & disseminates information from the SEC on the needs of specific disabled students. The Special Needs Tutor also monitor requests for, and provision of, specific examination and assessment arrangements, publicise SNT 'surgery' arrangements and make available time to meet with individual disabled students to enable them to discuss their own school-specific disability issues where necessary. The tutor takes a pro-active role in monitoring the welfare and academic progress of disabled students within the school.

In-class semester assessments are arranged by the Module tutor. The Module tutor will, where appropriate, ensure that any arrangements made for students requiring special consideration will be checked by the University Student Enabling Centre to ensure fairness and equability, and that the provisions of the University Equal Opportunities policy are met. These arrangements will apply to those students who have identified special learning requirements.

LIS provide user education on how to access printed and electronic resources and provide general academic skills support. Students can attend an individual drop-in session, one-on-one discussion with a Learning and Skills Librarian for advice on areas such as academic writing, assignment planning, exam preparation etc. In addition, there is a regular timetable of bookable workshops covering information and digital literacy skills, including academic referencing. Students are supported by a designated Liaison Librarian who is available to support research and project work. Further details are on the LIS skills for learning page http://www.wlv.ac.uk/lib/skills_for_learning.aspx

Each module also provides an extensive reading list and suggestions for web-based and other electronic resources. The University intranet system is widely used in all modules for a variety of pedagogical and more practical purposes relating to the dissemination of information and the submission of student work. Activities provided on CANVAS by academic staff are done with the help of technical staff.

Employability in the Curriculum:

This course prepares graduates for organizing, interpreting and presenting quantitative data as well as communicating economic ideas – skills regularly identified as desirable by both private and public sector employers.

This degree course will create economists who have an in-depth knowledge of the subject following the debates generated by the recent financial and economic crisis. This knowledge and the related skills will be enhanced by seminars, guest lectures and visits to research centers.

This course provides access to a range of career opportunities, particularly roles such as: economic analyst (private sector); graduate policy advisor (central government); economic data manager (private and public sector); economic growth officer (public sector) and European advisor (policy organisation).

THE UNIVERSITY OF OPPORTUNITY
