

Course Specification

Published Date:	08-Apr-2022
Produced By:	Multi Type Usr Record For All Personnel
Status:	

Core Information

Awarding Body / Institution:	University of Wolverhampton		
School / Institute:	Institute of Health		
Course Code(s):	HL022T01UV	Full-time	4 Years
	HL022T31UV	Part-time	8 Years
Course Title:	BSc (Hons) Public Health with Foundation Year		
Hierarchy of Awards:	Bachelor of Science with Honours Public Health Bachelor of Science Public Health Diploma of Higher Education Public Health Certificate of Higher Education Public Health University Statement of Credit Public Health		
Language of Study:	English		
Date of DAG approval:	01/Sep/2017		
Last Review:	2020/1		
Course Specification valid from:	2017/8		
Course Specification valid to:	2026/7		

Academic Staff

Course Leader:	Mrs Bhawna Solanki
Head of Department:	Mr Ranjit Khutan

Course Information

Location of Delivery:	University of Wolverhampton
Category of Partnership:	Not delivered in partnership
Teaching Institution:	University of Wolverhampton
Open / Closed Course:	This course is open to all suitably qualified candidates.

Entry Requirements:

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

Applicants must hold:

- GCSE English at grade 4+ (previously grade C) or equivalent (Key Skills Level 2 English or Functional Skills Level 2 English).
- Please note we do NOT accept GCSE Short Courses.
- You must provide a satisfactory personal statement detailing your motivation for studying this course. See [our Personal Statement Guidance for further information](#).

If you've got other qualifications or relevant experience, please contact The Gateway for further advice before applying.

Applicants must be 18 years old or above at the start of the course.

International Applicants

Your qualifications need to be deemed equivalent to the above entry requirements.

- English Language requirements are normally IELTS 6.5 with a minimum of 5.5 in each area (unless otherwise stated) or equivalent accepted qualification <https://www.wlv.ac.uk/international/international-academy/courses-at-the-international-academy/language-entry-requirements/>
- Please use the following link <https://www.wlv.ac.uk/international/international-academy/courses-at-the-international-academy/> to see the range of English Language Pre-Sessional courses offered by the University of Wolverhampton International Academy.
- For further information relating to overseas qualification please use the following link <https://www.wlv.ac.uk/international/our-locations/your-country/>

Additional Course Costs

Optional Costs

- Various certified courses are available via My Course + More, ranging from £0-£200
- Business and overseas Field trips – e.g. India field trip, offered annually (September) with a total fee of around £1300 which includes course fee, flights, visa, accommodation, meals and internal travel costs. (Overseas field trips may not be available to international students due to their Visa restrictions)

Further information on these additional costs will be provided prior to the start of your studies.

Distinctive Features of the Course:

Programmes with a foundation year are designed for talented applicants who are not eligible for direct entry to an undergraduate course. A foundation year enables you to gain the subject-specific knowledge and skills required to embark onto degree-level studies and from your first day, you'll be recognised as a full member of the student community with access to library, IT and sport facilities.

- Our Foundation Year programme has been designed to prepare you for studying at undergraduate level. The course will support you to develop the required skills and knowledge to transition effectively into

Level 4 study.

- A contemporary public health focus.
- Opportunities for inter-disciplinary learning which are vital for employment within the increasingly integrated health and social care arena.
- A friendly, helpful and student focused team of academic and administrative staff.
- Module teaching teams who are subject specialists with extensive experience working within the health care arena, all of whom have additional professional and academic qualifications which they bring to the learning experience to ensure its contemporary nature for the student.
- Visiting and honorary lecturers from health care related fields who bring contemporary and real-world examples of practice into the classroom.

Public health has always been popular but awareness of the work of public health professionals and the range of roles available in this field, has increased since the Covid-19 pandemic. In light of the impact of the pandemic on public health practice both now and in the future, we have reviewed and strengthened our public health programme so you can be prepared to address these challenges.

This BSc Public Health course with Foundation Year draws on UK government policy directives in public health - *Fit for the Future: Public Health People (2016)*, *NHS Long Term Plan (2019)* and *The Future of Health and Care: Working together to improve health and social care for all (2021)* – as well as the changes to public health service provision by the replacement of Public Health England with the National Institute of Health Protection. These policies refer to the need for a wider perspective to dealing with public health issues that addresses the wider determinants of health, a strong emphasis on a pro-active and preventative approach to health care in order to ease the current and increasing demands on the NHS, and the roles of a range of professionals.

We appreciate that success against key public health issues and diseases has no geographical boundaries, and our students may come from a variety of countries, so we also draw on wider international public health policy and priorities. As such, this three-year course adopts a strong focus on addressing health inequalities, empowering individuals, and communities, and building the skills needed for a pro-active public health workforce. So, by focusing on soci-ecological models of health rather than just medical and epidemiological ones, our public health programme is able to offer a new, modern and global understanding of public health that reflects the changes and developments witnessed in current and future health services both in the UK and overseas.

Following the Foundation Year, you will join the BSc Public Health programme which is mapped against the UK Public Health Register (UKPHR) criteria for practitioner standards. The UKPHR provides public protection by ensuring that only competent public health professionals are registered and that high standards of practice are maintained. The UKPHR is one of 3 bodies that registers public health practitioners to work at consultant or director level (the other two being the Faculty of Public Health (FPH) and the General Medical Council). Of these, the UKPHR is the only body that provides practitioner level registration which is suitable for undergraduates after relevant practice experience. This mapping has been approved by the UKPHR education and training committee and is available to view on their website at www.ukphr.org; as such this course can be accepted as Approved Prior Learning (APL) if you go on to seek registration.

The UKPHR criteria for practitioner standards have also been mapped against the Public Health Skills and Knowledge Framework and refers to some of the core competencies outlined by the FPH. The course follows this framework throughout, at the level needed to equip you for public health practice.

The University of Wolverhampton's BSc Public Health programme is also one of only two universities to be formally partnered with The Royal Society for Public Health (RSPH) and you will be offered reduced cost student membership of RSPH as part of our "My Course and More" events.

With over 20 years of delivering public health programmes at undergraduate and postgraduate levels, we have a range of established partnerships with public health practitioners and organisations, both in the UK and overseas. Our team of academics actively maintain links with local stakeholders that comprise a range of NHS, private, independent, and voluntary organisations, and are able to improve practice through research, and help inform curriculum developments to ensure that this course meets the needs of potential employers. We also actively maintain links with our alumni, many of whom have gone to develop successful careers in public health and will become part of your extensive network.

Our assessment strategy aims to mirror disciplinary practices and real-world contexts, preparing you for the challenges of independent and teamwork, and developing skills that will help you to succeed in the workplace. Following discussions with employers and our alumni, we are aware that the ability to write

reports where issues are researched and succinctly recorded with workable actions, working with a team on a group task, and presentation skills, are highly valued by employers and as such our assessment strategy has taken this into account. Whilst we still include some essays and exams to ensure you can demonstrate your knowledge in key public health areas, we have included presentations, group work and report writing as methods of assessment to prepare you for the workplace. You will therefore experience creative, engaging, and meaningful assessment tasks which contribute to your ongoing development as a critical thinker and as a life-long learner. Assessments will build on each other and grow in complexity, enabling you to see the connections across modules and years.

Students from diverse backgrounds are supported through an inclusive curriculum where every module, session, teaching material or activity is assessed for its suitability. Your prior experience and background will also be respected, and you will be encouraged to contribute your unique perspectives, primarily through open discussion in seminars as well as interactive exercises that encourage you to share your diverse experiences.

The academic teaching team also provide a range of extra-curricular activities to support you in your studies and wider interest in public health issues. These include a regular public health open-seminar series where professionals in health and research share details of their work and engage in lively debate. For an additional fee we also offer field trips and other events, details of which will be shared with you throughout your studies. The field trips and the engagement with those in practice, as well as the support from other departments that can help you with entrepreneurial and business developments, are a part of our work-based learning (WBL) approaches which are embedded in the curriculum. WBL is an educational strategy that provides you with real-life work experiences where you can apply academic and technical skills and develop your employability.

The BSc (Hons) Public Health programme with Foundation Year is one of many courses run by the Faculty of Education, Health and Wellbeing, which has an established reputation for excellence in terms of the quality of its courses, particularly through the provision of innovative approaches to teaching and learning, and for the student centred-friendliness of its academic and administrative staff. You will have the benefit of being taught by very experienced staff with first-hand knowledge of working in the public health field in a variety of professional roles, and so can help you integrate and apply the knowledge you will gain

Educational Aims of the Course:

The course has been carefully designed to meet your needs, and the needs of current and potential employers. The following reference points have informed the award:

Subject specific

UK Public Health Register (UKPHR) and Public Health Skills and Knowledge Framework (PHSKF)

The UKPHR provides public protection by ensuring that only competent public health professionals are registered and that high standards of practice are maintained. The UKPHR is one of 3 bodies that registers public health practitioners to work at consultant or director level (the other two being the Faculty of Public Health and the General Medical Council). Of these, the UKPHR is the only body that provides practitioner level registration which is suitable for undergraduates after relevant practice experience.

This award and modules are mapped against the UKPHR criteria for practitioner standards, and as such the UKPHR have agreed that this award could be accepted as Approved Prior Learning by practitioners seeking registration. The course follows this framework throughout at the level needed to equip you for public health practice. This has mapping has been approved by the UKPHR education and training committee in 2021 and is available on their website: www.ukphr.org.

The UKPHR criteria for practitioner standards are also mapped against the PHSKF <https://www.gov.uk/government/publications/public-health-skills-and-knowledge-framework-phskf>.

Faculty of Public Health (FPH)

The FPH is the standard setting body for specialists in public health in the UK, it sits at the forefront of the development and transformation of the Public Health profession. The course covers many of the key areas of the FPH curriculum and the principles outlined in the FPH's Good Public Health Practice framework. For more information see: <http://www.fph.org.uk>

Royal Society for Public Health (RSPH) - Professional Practice Framework

The RSPH Professional Practice Framework enables managers and aspiring managers to articulate what they do, how they work, and how they make an impact on themselves, the people with whom they work, the services that they are responsible for, and the organisations which they work, lead, and manage. The award's learning objectives address aspects of the framework and ensure that you will be prepared to meet the requirements of conduct, competence and behaviour expected of those working in public health.

https://www.ukphr.org/wp-content/uploads/2018/12/Public_Health_Framework.pdf

World Health Organisation (WHO) and Association of Schools of Public Health in the European Region (ASPHER) Competency Framework for the Public Health Workforce in the European Region (2020)

Aimed at policy-makers, professionals with a particular interest in the public health workforce, and other stakeholders, such as educational institutions, public health institutes and others responsible for implementing policy and professional organizations. The MPH course has been designed to also take into account the framework and in particular, the pursuit of Sustainable Development Goals. See <https://www.aspher.org/aspher-core-competences-list.html>

Fit for the Future: Public Health People (DoH, 2016)

Outlines 5 important themes that underpin the response to developing a public health workforce, future capabilities and skills.

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/524599/Fit_for_the_Future_Report.pdf

Public Health Resource Unit

This is a comprehensive and detailed map of the many levels of knowledge and skills needed for public health careers. The course follows this framework throughout, at the level needed to equip you for public health practice. See <http://www.phru.nhs.uk/>

Academic reference points

- QAA Subject Benchmark Statements* www.qaa.ac.uk/en/quality-code/subject-benchmark-statements
- QAA Qualifications and Credit Frameworks www.qaa.ac.uk/en/quality-code/qualifications-and-credit-frameworks
- University Policies and Regulations <https://www.wlv.ac.uk/about-us/governance/legalinformation/policies-and-regulations/academic-regulations/>

*There are currently no relevant subject benchmark statements. However, it is noted in the QAA (2016) Health Studies benchmark that a multi and inter-disciplinary approach should be adopted when looking at individual, community and population health. Accordingly, the BSc (Hons) Public Health explores health as a contested concept, considers the multi-disciplinary nature of practice, focuses on contemporary issues and considers the myriad of issues that surround diversity. Underpinning key concepts are embedded in the modules and include an examination of key theoretical and policy approaches as well as that of the role of individuals in furthering the aims of Public Health.

6HW162	Environmental Management and Sustainable Health	20	SEM1	Core
6HL011	Health Improvement and Protection	20	SEM1	Core
6HW160	Epidemiology	20	SEM1	Core
6HL012	Global Health: Issues and Actions	20	SEM2	Core
6HW155	Leadership and Collaborative Working	20	SEM2	Core
6HL014	Research for Health Project	20	SEM2	Core

Continuing students will follow the programme indicated below:

September (Full-time)

Part time students study alongside full time students. However, they do not study more than 80 credits in each academic calendar year.

Module	Title	Credits	Period	Type
6HW109	Environmental Management and Sustainable Health	20	SEM1	Core
6HL004	Promoting Health: Assessing and Addressing Health Needs	20	SEM1	Core
6HW001	Epidemiology	20	SEM1	Core
6HL005	World Health: Examining Global Issues and Actions	20	SEM2	Core
6HW034	Leadership for Healthcare Practitioners	20	SEM2	Core
6HL007	Research for Health Project	20	SEM2	Core

Please note: Optional modules might not run every year, the course team will decide on an annual basis which options will be running, based on student demand and academic factors, to create the best learning experience.

Learning, Teaching and Assessment

Academic Regulations Exemption:

None

Reference Points:

Overview of Assessment:

As part of the course approval process, the course learning outcomes were mapped to each of the modules forming the diet of the programme of study. This process confirmed that all course learning outcomes can be met through successful completion of the modules. This mapping applies to the final award as well as to all of the intermediate awards.

XX

Learning Outcomes	Modules
-------------------	---------

Teaching, Learning and Assessment:

General University support:

The University Library is the key source of academic information for students. The Library provides access to a wide range of online information sources, including eBooks, e-Journals and subject databases as well as printed material and DVDs. A range of study spaces are available in each of our libraries, including social, quiet and silent areas. In addition to our day to day 'on campus' support, our online 'Ask the Library' chat service, ASSIST is staffed 24 hours a day.

The University Library also provides students with academic skills support via the Skills for Learning programme. Students can attend workshops or ask for one-to-one help on a range of skills such as academic writing and referencing. Support is available both on campus and virtually via the VLE, and a range of online skills material is also available at: www.wlv.ac.uk/lib/skills.

The Student Support and Wellbeing webpages, located below

<https://www.wlv.ac.uk/current-students/student-support/student-support-and-wellbeing-ssw/>

offers students advice on a variety of matters linked to their Health and Wellbeing.

Please [contact the Team](#) to:

- discuss disability or specific learning difficulty support
- access advice and support for a mental health condition
- access information about supporting your mental health and wellbeing
- connect with our Chaplaincy service
- seek advice on funding and financial support
- seek advice as a [D/deaf or hearing impaired student](#)

Course Specific Support

Student Advisors

<https://www.wlv.ac.uk/about-us/our-schools-and-institutes/faculty-of-education-health-and-wellbeing/fehw-student-services/>

There are student advisors within the Faculty of Education Health, and Wellbeing. They are here to support you in a professional and confidential way by either resolving or referring your query to one of our many professional services within the University. The student advisors work closely with the various support networks within the University and are supported by our graduate interns. Please see the points below for some examples of their support.

- Sign posting to Support and Wellbeing Services
- Support with progression
- Advice on extensions and extenuating circumstances claims
- Support students with attainment and retention

Advisors and interns can be contacted via email (FEHWstudentservices@wlv.ac.uk).

Personal Tutors

You will be allocated a personal tutor at the start of your course with whom you will build and develop a relationship to help you work towards achieving the course learning outcomes. Your personal tutor will meet with you on a regular basis (at least three times per academic year) in order to offer support, identify if you are making satisfactory progress and to offer support if you are at risk of withdrawal. Your personal tutor will assist you in your personal and academic development, planning and progression as well as helping you liaise with other staff and support facilities in their Faculty and the wider University. You can find out who your personal tutor is by visiting [e:Vision](#).

Module leaders

Your module leaders are your first point of contact for everything module related whether that's help with a particular part of the module or advice on how to complete the assessment. Module leaders will usually be able to schedule a meeting with you via phone, WebEx or Skype. A list of module leaders is available in your [Course Guides](#), along with their contact details.

Course leaders

The course leader has overall responsibility for your course and the enrolled students. They monitor the quality of the course through course committees which collect feedback from staff and students. They manage the academic programme of study and are responsible for reporting any issues raised and examples of good practice. They are supported by leads at each level of study. Level leads will be in touch with you at various points in your award and support your transition through from one level to the next.

Faculty Student Enabling Tutor

The Faculty Student Enabling Tutor (FSET) liaises with the Student Support and Wellbeing (SSW) department regarding provision for specific disabilities and disseminates information from the SSW on any identified

learning needs. The FSET monitors requests for, and provision of, specific examination and assessment arrangements. The FSET takes a pro-active role in monitoring the welfare and academic progress of disabled students within the school.

Academic Coaches

Academic Coaches are linked to all programmes and have specific role in supporting students' transition into higher education at undergraduate Level 4.

Working in partnership with you

The University and the Student's Union take deliberate steps to engage all students, individually and collectively, as partners in the assurance and enhancement of their educational experience. Our student charter sets out what you are expected to give and what you gain by involving yourself in as much as possible. All of our support mechanisms are enshrined in the Student Charter:-<https://www.wlv.ac.uk/about-us/student-charter/>

Assessment Methods:

At the University of Wolverhampton, a variety of modes of assessment will be used to support and test your learning and progress and to help you develop capabilities that are valued beyond your University studies and into your working life. Your course may include a variety of assessment activities:

Written examinations (including online examinations, open and closed book examinations and quizzes)
Coursework (for example, essays, reports, portfolios, project proposals and briefs, CVs, poster presentation)
Practical (for example, oral and video presentations, laboratory work, performances, practical skills assessment)

In the final year of your undergraduate degree, and at the end of your postgraduate degree, you are likely to be expected to write an extended piece of work or research, such as a dissertation or a practice-based piece of research.

Student Support:

General University support:

University Learning Centres are the key source of academic information for students. Learning Centres provide physical library resources (books, journal, DVDs etc.) and offer a range of study areas to allow students to study in the environment that suit them best: Social areas, quiet and silent areas. Learning Centres also provide access to wide range of online information sources, including eBooks, e-Journals and subject databases. Learning Centres also provide students with academic skills support via the Skills for Learning programme. Students on campus can attend workshops or ask for one-to-one help on a range of skills such as academic writing and referencing. Students can access a range of online skills material at: www.wlv.ac.uk/lib/skills.

The University also has a host of other services to support you, please take a look at the Student Support website: www.wlv.ac.uk/current-students/student-support/. If you have any questions, need help or advice then ASK@WLV is there for you: www.wlv.ac.uk/current-students/askwlv/.

The Student Support and Wellbeing webpages, located below

<https://www.wlv.ac.uk/current-students/student-support/student-support-and-wellbeing-ssw/>

offers students advice on a variety of matters linked to their Health and Wellbeing.

Our student charter sets out what you are expected to give and what you gain by involving yourself in as much as possible. All of our support mechanisms are enshrined in the Student Charter:- <https://www.wlv.ac.uk/about-us/student-charter/>

Employability in the Curriculum:

The University acknowledges the diversity of our student population and the need to recognise that the individual aspirations and motivations of students are distinct and varied in relation to career and personal development. Reflecting this, there are a range of approaches through which employability is fostered, either explicitly or implicitly within the BSc (Hons) Public Health. These are not mutually exclusive and overlap to greater or lesser degrees. Approaches range from focused modules which explore working within health and care settings, through to the Wolverhampton Enterprise & Employability Award, supported personal development planning, the design of the curriculum (student-centred, active learning) and wider activities and opportunities available through the Careers, Enterprise and the Workplace service. These and other initiatives aim to create graduates who are enterprising and entrepreneurial.

In designing the programme, the curriculum planning team have carefully considered the University of Wolverhampton Graduate Attributes framework to ensure that you can acquire and evidence skills that employers so keenly seek. Firstly, the course will enable you to develop your skills in global citizenship and a cultural and social mindset. In doing so, you will gain skills so you can become culturally and socially aware, emotionally intelligent, an effective communicator, self-aware, confident, motivated, ethical, collaborative, and influential. Secondly, the course will enable you to develop your knowledgeable in public health, by enabling you to become digitally fluid, technically skilled, a critical thinker, analytical, reflective, curious, experienced, autonomous and engaged. Finally, the course will enable you to develop a professional and enterprising mindset, where you will be encouraged to become innovative and enterprising, commercially aware, resilient, ambitious, visionary, goal oriented, creative, a lateral thinker and adaptable.

By actively engaging in key contemporary issues both in the classroom and the field (where appropriate) we aim to foster an approach to learning which moves beyond the mere acquisition of knowledge ('surface learning') to comprehending the significance of the subject, making sense of the concepts presented and fitting them within a 'bigger picture' ('deep learning'). This 'deep learning' involves high-level cognitive skills: the ability to distinguish between competing ideas, critically analysing, evaluating and assessing them, in order to construct new understandings. It also requires you to take greater responsibility for your own learning, becoming self-directed, reflective, and motivated. Whilst an awareness of contemporary professional contexts and techniques is desirable, these skills of initiative, personal responsibility and intellectual curiosity are the attributes which employers consistently rate highly in surveys of graduate skills.

This course will prepare you to move into the field of public health employment, as public health practitioners, with the possibility of moving on to become a public health specialist. Several agencies offer opportunities, with the public, private or voluntary sector, and within the health and social care arena. The variety of occupational roles include:

- Health Promoter
- Health Advisor
- Health Practitioner
- Public Health worker
- Health inequalities worker
- Health trainer
- Housing Services Officer
- Sexual Health Advisor
- Smoking Cessation Counsellor
- Community Development Worker
- Health information Officer
- Health researcher
- Health management
- Wellbeing advisor
- Community support worker
- School health advisor
- Health educator

Whilst the course does not include a work-based placement, we have good relationships with local public health organisations and other employers, and will support you if you would like to explore work experience opportunities.

For those who wish to continue in further study or research, the Faculty of Education, Health and Wellbeing currently offers a Post Graduate Certificate, Post Graduate Diploma, a Masters Degree in Public Health and PhD opportunities.

These degree programmes and the interim awards may be studied full or part-time, along with more flexible study options for those who wish to take stand-alone modules as part of their Continuing Professional Development (CPD).
