Students may apply for RPL and receive credit, subject to the guidelines set out in the University of Wolverhampton RPL guidelines.

Distinctive Features of the Course:

One of the phenomena of the 21st century has been that of globalisation. This course equips students with the knowledge and expertise to manage within this global framework. As globalisation increases, more organisations have to work beyond their regional boundaries, compete in diverse global environments and find that their traditional domestic markets are open to global challenges. These organisations need experts who can work across multicultural barriers, develop effective international strategies and source products internationally. This course will train students in these business key areas.

Educational Aims of the Course:

The course will provide an interdisciplinary approach to global citizenship and will help students develop their own understanding of complex notions in the international business environment. Additionally, the course will help students develop Digital Literacy skills through the use of applications software employed by contemporary organisations. The development of student knowledge and understanding of a range of international business and management practices and the ability to apply them effectively in an entrepreneurial and innovative manner will also be emphasised, as it is recognised that entrepreneurship is a key force for successful economic growth.

Teaching, Learning and Assessment:

Students are required to locate and evaluate appropriate digital information sources related to the issues considered in the modules on this course. They are also expected to participate in class forum activities on the VLE.

Student participation in a range of in-class discussions and activities is expected in order to consider theory and practice related to various topics covered in the modules.

The international nature of this course means that students will be researching and discussing from a range of perspectives the theory and evidence in the context of global business and management; this will enable them to develop personal and professional values that would help them play a substantial role in a global business environment.

Assessment Methods:

At the University of Wolverhampton, a variety of modes of assessment will be used to support and test your learning and progress and to help you develop capabilities that are valued beyond your University studies and into your working life. Your course may include a variety of assessment activities:

Written examinations (including online examinations, open and closed book examinations and quizzes)
Coursework (for example, essays, reports, portfolios, project proposals and briefs, CVs, poster presentation)
Practical (for example, oral and video presentations, laboratory work, performances, practical skills assessment)

In the final year of your undergraduate degree, and at the end of your postgraduate degree, you are likely to be expected to write an extended piece of work or research, such as a dissertation or a practice-based piece of research.

Student Support:

There are many levels of support that will be available for students learning on this course, including Personal Tutor, Course Leader, and members of the Learning Centres, Faculty Enabling Tutor (FET), and different assessment methods.

A Personal Tutor will be allocated to every student and will maintain regular communication (virtual and/or face-to-face) with each of their designated tutees in order to assist students in their personal and academic development, planning and progression. In addition to offering advice and guidance, the Personal Tutor will help students liaise with other staff in their school and the University in order to obtain support, including study skills support.

The Course Leader will monitor the academic and experiential quality of the Course through Award Boards, focus groups and other channels. Course Leader will also support and direct students proactively on the Course, and will respond to inquiries and requests from students with regard to the academic programme of study.

Faculty Enabling Tutor (FET), will liaise with the Student Enabling Centre (SEC) regarding provision for specific disabled students, and disseminate information from the SEC on the needs of specific disabled students. The FET will also monitor requests for, and provision of, specific examination and assessment arrangements, publicise "surgery" arrangements and make available time to meet with individual disabled students to enable them to discuss their own school-specific disability issues where necessary. The FET will take a pro-active role in monitoring the welfare and academic progress of disabled students within the school.

In-class semester assessments are arranged by the Module tutor, who will, where appropriate, ensure that any arrangements made for students requiring special consideration will be checked by the University Student Enabling Centre to ensure fairness and equability, and that the provisions of the University Equal Opportunities policy are met. These arrangements will apply to those students who have identified special learning requirements.

Members of the Learning Centres are invited to speak to students about accessing printed and electronic resources and provide support for research. LIS also provide a number of electronic resources including podcasts, which can support distance learners in these areas. The 'skills for learning' skills support facility can be accessed electronically via www.wlv.ac.uk/lib/skills

Employability in the Curriculum:

This course equips students with the knowledge and expertise to manage within the global framework. It has been achieved through up to date industrial database cross countries; digital literacy skills through the use of applications software employed by contemporary organisations; the ability to apply management practices effectively in an entrepreneurial and innovative manner. This course provides access to a range of career opportunities, such as business analyst, supply manager, relationship manager and project managers under multi-culture (nation) operational settings.
