

Course Specification

Published Date:	16-Aug-2021
Produced By:	Laura Clode
Status:	Validated

Core Information

Awarding Body / Institution:	University of Wolverhampton		
School / Institute:	Institute of Health		
Course Code(s):	MI010M01UV	Full-time	2 Years
UCAS Code:	B721		
Course Title:	Bachelor of Midwifery with Honours (2 Year)		
Hierarchy of Awards:	Bachelor of Midwifery with Honours Bachelor of Midwifery with Honours (2 Year) Bachelor of Midwifery Health in Childbirth Diploma of Higher Education Health in Childbirth University Statement of Credit University Statement of Credit		
Language of Study:	English		
Date of DAG approval:	19/Aug/2020		
Last Review:			
Course Specification valid from:	2019/0		
Course Specification valid to:	2025/6		

Academic Staff

Course Leader:	Miss Arlene Munroe
Head of Department:	Ms Marcia Edwards

Course Information

Location of Delivery:	University of Wolverhampton
Category of Partnership:	Not delivered in partnership
Teaching Institution:	University of Wolverhampton
Open / Closed Course:	This course is open to all suitably qualified candidates.

Entry Requirements:

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

Distinctive Features of the Course:

- This two year (shortened) course has been specifically designed to build upon your strengths as a registered practitioner to support you become a professional and motivated midwife. The role of the midwife as a catalyst for improving the health of families is well-recognised, and reflecting the focus within the NHS Long Term Plan (2019) our courses include a strong focus on current public health priorities, the care of vulnerable groups, and the increasingly complex health needs of childbearing women.
- This course offers you "added value" opportunities such as Resuscitation Council approved Neonatal Life Support (NLS) training and Undergraduate PROMPT (Practical Obstetric Multi-Professional Training) courses, as well as providing you with full training to become competent in NIPE (Newborn Infant Physical Examination) prior to registration.
- Inter-professional learning opportunities are embedded in both years of the programme. These are vital in supporting you to further develop the knowledge, skills and insights necessary for effective working within increasingly integrated and complex health and social care arenas.
- The university prides itself on its excellent partnership working arrangements with local NHS Trusts and other non-NHS organisations providing placement opportunities. This partnership works to provide excellent support for you whilst you are on placement, ensuring that you are supported in accessing relevant learning opportunities. Our tutors work closely with practice staff to promote a dynamic, interactive learning environment in which you are encouraged to be an active participant in learning rather than a passive recipient. Through a range of approaches to learning and teaching you will be encouraged to ask questions, investigate problems, propose solutions and adopt a critical approach to your practice – qualities which are essential in the delivery of high quality midwifery care. We will empower you with the tools, methods and thinking processes to read and evaluate current research, stimulating curiosity about evidence-based practice and you will be supported to develop as a self-directed learner.
- Our assessment strategy aims to mirror disciplinary practices and real-world contexts, preparing you for the challenges of independent and team work, and developing skills that will help you to succeed in the workplace. You will experience creative, engaging and meaningful assessment tasks which contribute to your ongoing development as a critical thinker and as a life-long learner. Assessments will build on each other and grow in complexity, enabling you to see the connections across modules and years.
- The midwifery lecturing team are committed to achieving UNICEF UK Baby Friendly Accreditation for their midwifery programmes.

This course also benefits from:

- Visiting and honorary lecturers / speakers from health care and related fields who bring contemporary and real-world examples of practice into the classroom.
- Links and knowledge from local, national and international research initiatives undertaken in the Institute of Health and the wider University research institutes.

Educational Aims of the Course:

Our pre-registration midwifery courses prepare you to practice safely and effectively as a midwife (NMC 2019). The programmes meet the University of Wolverhampton and NMC standards required for a conjointly validated programme that confers an academic award (BMid (Hons)) with eligibility to enter the NMC professional register as a midwife.

The programme aims to prepare graduate practitioners who can deliver and lead evidence-based care for families and babies, working in partnership with multi-disciplinary teams. Our new programmes reflect the requirements of the 'Future Midwife' standards of education and proficiency (NMC 2019) including optimising normal physiological processes, providing a first-line response to, and management of complications, as well as supporting women and newborns with additional care needs. Throughout all levels there is a strong focus on perinatal mental health, public health and continuity of care.

To meet the needs of women and their families within our society, the programme reflects a dynamic student centred approach to education with emphasis on active learning, developing leadership competencies, research-awareness, professional reflection and critical thinking in preparation for autonomous practice within the maternity services. In addition, the programme seeks to prepare student midwives for employment including providing them with strategies to promote their resilience and demonstrate a commitment to ongoing personal and professional development.

Aims:

This course aims to:

- Develop graduates who meet the NMC Standards (NMC 2018, 2019) and become eligible to register on the midwifery section of the NMC professional register
- Develop flexible practitioners who can transfer and synthesise skills and knowledge to meet the demands of differing practice environments and who recognise both the accountability and responsibilities of the midwife's role
- Develop the knowledge, understanding, skills and cultural competence which ensure care is co-ordinated and tailored to individual women and newborn infants throughout the continuum of care and across diverse settings
- Equip graduates to be autonomous and reflective practitioners, providing safe, effective and empowering midwifery care for women, newborn infants and their families.
- Enable midwives to be confident in using an evidence-based approach to support decision making in complex mental, physical, cognitive and behavioural situations.
- Develop graduates who are effective role models and are committed to taking responsibility for the delivery and development of midwifery care utilising appropriate delegation and supervision.

Ensure that graduates have an awareness of local and national policies impacting on professional practice, service development and system integration.

On successful completion of your studies you will be eligible to apply for registration as a midwife with the Nursing and Midwifery Council.

The BMid (Hons) Midwifery course also provides you with the opportunity to obtain training and qualifications in NIPE, Newborn Life Support and Undergraduate PROMPT (Practical Obstetric Multi-Professional Training).

Intakes:

September

Major Source of Funding:

Office for Students (OFS)

Tuition Fees:

Tuition fees are reviewed on an annual basis. The fees applicable to a particular academic year will be published on the University website.

Year	Status	Mode	Amount
2020/1	H	Full Time / Sandwich	£9250.00
2020/1	Overseas	Full Time / Sandwich	£12250.00
2021/2	H	Full Time / Sandwich	£9250.00
2021/2	Overseas	Full Time / Sandwich	£12950.00

PSRB:

MI010M01UV (Full-time)

Professional Accreditation Body:
Nursing and Midwifery Council (NMC)

Accrediting Body:
Nursing and Midwifery Council (NMC)

Accreditation Statement:
Recognised by the Nursing and Midwifery Council (NMC) for the purpose of registration as a qualified midwife.

Approved	Start	Expected End	Renewal
28/Jul/2020	01/Sep/2020		

Course Structure:

September (Full-time)

Part time students study alongside full time students. However, they do not study more than 80 credits in each academic calendar year.

Year 1

Module	Title	Credits	Period	Type
5MI012	Developing Clinical Practice	40	INJR	Core
5MI015	Transition from Nursing to Midwifery	20	SEM1	Core
5MI014	Developing Professional Midwifery	20	SEM1	Core
5MI011	Developing Care of Mother and Baby	40	SEM2	Core

September (Full-time)

Part time students study alongside full time students. However, they do not study more than 80 credits in each academic calendar year.

Year 2

Module	Title	Credits	Period	Type
6MI018	Advanced Clinical Practice	40	INJR	Core
6MI016	Advanced Care of Mother and Baby	40	SEM1	Core
6MI019	Advanced Professional Midwifery	20	SEM2	Core
6MI017	Advanced Enquiry for Midwifery Practice	20	YEAR	Core

Please note: Optional modules might not run every year, the course team will decide on an annual basis which options will be running, based on student demand and academic factors, to create the best learning experience.

Learning, Teaching and Assessment

Academic Regulations Exemption:

Section 1.2.3 - Exemption for delivery outside the standard University Academic Calendar, including Year Long modules, to enable students to complete the required hours for placements.

Section 1.3.1 - Exemption to exceed normal module credits within the standard University Framework allowing for the use of some 40 credit practice and theory modules.

Section 4.3.3 - Exemption in accordance with the Faculty Fitness to Practice procedures. There will be no automatic right to a second attempt for any failed practice components at the discretion of the Assessment Board.

Section 4.3.5 - Exemption in accordance with the standards of proficiency required by the Nursing and Midwifery Council (NMC). There will be no right to repeat practice modules (4MI011, 5MI012 or 6MI018) if students fail any of the compulsory practice components. Repeats are permitted if students have passed all relevant compulsory practice components for that module.

Section 4.4.3 - Exemption in accordance with the standards of proficiency required by the Nursing and Midwifery Council (NMC). No compensation will be awarded on any modules. Students will be granted the

opportunity of a third attempt on theory modules at levels 4, 5 and 6 (for no more than 40 credits at each level of study and maximum of 80 credits overall) providing they have gained at least 80 credits at the same level of study and have passed all compulsory practice components in practice modules.

Section 4.5.1 - Exemption requiring students to pass all modules before progressing to the next level of study.

Section 5.1.1 - Exemption to exceed the standard credit requirements for a 'top-up' degree (two year shortened route), increasing to a minimum of 240 credits, with 120 credits required at Level 5 and 120 credits required at Level 6.

APPROVED (by Chair's Action on 5/5/2020).

PSRB Reference Points

- The professional and statutory regulatory body for your professional course is the Nursing and Midwifery Council (NMC). They provide professional standards of practice and behaviour for Nurses, Midwives and Nursing Associates, as outlined in The Code (NMC 2018).
- As part of the course you are required to demonstrate that you have the skills, knowledge, health and character to care for people safely. This requires you to demonstrate high level reflective skills and a duty of candour towards patients/service users. Professional standards of practice and behaviour for nurses, midwives and nursing associates are outlined in The Code (NMC 2018) and the Guidance on Health and Character (NMC 2019). The Code (NMC 2018) is structured around four themes; prioritise people, practice effectively, preserve safety and promote professionalism and trust. These standards must be met and upheld in order to register and practice in the UK.
- During enrolment at the start of each year, and at the end of the course, you will be required to undertake a self-declaration to declare any cautions and/or convictions, reprimands or warnings from the police and any health conditions and/or disability that could affect your ability to practice safely and effectively. You must declare any changes to your health or character status as soon as they arise: you should not wait for the annual declaration process to do this. You can discuss any changes with your personal tutor or the course leader so that they can identify whether any further action or investigation is required with regards to your fitness to practise.
- The pre-registration midwifery course is structured so that 50 percent of your learning occurs in the university and 50 percent in practice. You will have supernumerary status in practice; this means that you are additional to the workforce requirement and staffing figures. You will have additional scheduled learning and placement time outside of module delivery weeks to ensure that you are able to complete a total of 1800 hours in each setting, amounting to a total of 3600 hours to meet the NMC registration requirements. Any absence taken during your course, for example due to sickness, special leave or compassionate leave, will need to be retrieved. Any delay in completing the NMC required hours can delay your completion of the course and influence the timing of your registration. At the end of your course the Lead Midwife for Education is required to submit a declaration of good health and good character to the NMC and confirm that you have completed the required 1800 hours of theory and 1800 hours of practice. Your personal tutor will also ensure that you have experienced the range of hours expected of registered midwife; this will include working nights, weekends and bank holidays.
- You have up to five years to register your award with the NMC. In the event that you fail to register your qualification within five years you will have to undertake additional education and training or gain such experience as specified in the NMC standards.
- Further details will be available to you in your course guide and from the following link to the NMC website:
 - <https://www.nmc.org.uk/education/becoming-a-nurse-midwife-nursing-associate/guidance-for-students/>

Successful course completion and registration with the NMC entitles you to use the title Registered Midwife

Learning Outcomes:

DipHE Course Learning Outcome 1 (DHECLO1)

Demonstrate knowledge and critical understanding of the well-established principles of your area(s) of study, and of the way in which those principles have developed with an understanding of the limits of your knowledge, and how this influences analyses and interpretations based on that knowledge.

DipHE Course Learning Outcome 2 (DHECLO2)

Demonstrate the ability to apply underlying concepts and principles outside the context in which they were first studied, including, where appropriate, the application of those principles in an employment context

DipHE Course Learning Outcome 3 (DHECLO3)

Demonstrate knowledge of the main methods of enquiry in the subject(s) relevant to the named award, and ability to evaluate critically the appropriateness of different approaches to solving problems in the field of study

DipHE Course Learning Outcome 4 (DHECLO4)

Use a range of established techniques to initiate and undertake critical analysis of information, and to propose solutions to problems arising from that analysis

DipHE Course Learning Outcome 5 (DHECLO5)

Effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences, and deploy key techniques of the discipline effectively

DipHE Course Learning Outcome 6 (DHECLO6)

Demonstrate the qualities and transferable skills necessary for employment, requiring the exercise of personal responsibility and decision-making and undertake further training, developing existing skills and acquire new competences that will enable them to assume significant responsibility within organisations.

Ordinary Course Learning Outcome 1 (ORDCLO1)

Demonstrate a systematic understanding of key aspects of your field of study, including acquisition of coherent and detailed knowledge, at least some of which is at, or informed by, the forefront of defined aspects of a discipline with an appreciation of the uncertainty, ambiguity and limits of knowledge

Ordinary Course Learning Outcome 2 (ORDCLO2)

Demonstrate an ability to deploy accurately established techniques of analysis and enquiry within a discipline and apply the methods and techniques that they have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects.

Ordinary Course Learning Outcome 3 (ORDCLO3)

Demonstrate conceptual understanding that enables the student: A. to devise and sustain arguments, and/or to solve problems, using ideas and techniques, some of which are at the forefront of a discipline. B. to describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline.

Ordinary Course Learning Outcome 4 (ORDCLO4)

Demonstrate the ability to manage your own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline) and communicate information, ideas, problems and solutions to both specialist and non-specialist audiences.

Ordinary Course Learning Outcome 5 (ORDCLO5)

Critically evaluate arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions - to a problem

Ordinary Course Learning Outcome 6 (ORDCLO6)

Demonstrate the qualities and transferable skills necessary for employment requiring: A. the exercise of initiative and personal responsibility. B. decision-making in complex and unpredictable contexts. C. the learning ability needed to undertake appropriate further training of a professional or equivalent nature.

Honours Course Learning Outcome 1 (DEGCLO1)

Meet the NMC Standards of proficiency for pre-registration Midwifery education.

Honours Course Learning Outcome 2 (DEGCLO2)

Assume full responsibility and accountability for your own autonomous practice as a midwife, registered on the midwifery part of the NMC register.

Honours Course Learning Outcome 3 (DEGCLO3)

Provide care that is safe, effective and responsive to the needs of the individual, promoting and providing continuity of care / carer

Honours Course Learning Outcome 4 (DEGCLO4)

Exhibit the behaviours of a critical thinker, using research and evidence to inform and justify your practice

Honours Course Learning Outcome 5 (DEGCLO5)

Promote the development of healthy working relationships using positive role modelling and leadership skills to support effective multi-professional working

Honours Course Learning Outcome 6 (DEGCLO6)

Respond constructively to changes within the political, professional and social climate in order to adapt service provision to the changing needs of the childbearing woman.

Honours Course Learning Outcome 7 (DEGCLO7)

Demonstrate competence in digital literacy to quality assure and enhance your midwifery practice, and maintain your commitment to lifelong learning and the education of others

Overview of Assessment:

Module	Title	Course Learning Outcomes
5MI011	Developing Care of Mother and Baby	DHECLO1, DHECLO2, DHECLO3, DHECLO4, DHECLO5
5MI012	Developing Clinical Practice	DHECLO1, DHECLO2, DHECLO3, DHECLO4, DHECLO5, DHECLO6
5MI013	Developing Midwifery Skills	DHECLO1, DHECLO2, DHECLO3, DHECLO4, DHECLO5
5MI014	Developing Professional Midwifery	DHECLO1, DHECLO2, DHECLO3, DHECLO4, DHECLO5
6MI016	Advanced Care of Mother and Baby	DEGCLO1, DEGCLO3, DEGCLO4, DEGCLO5, DEGCLO7, ORDCLO1, ORDCLO2, ORDCLO3, ORDCLO4, ORDCLO5
6MI017	Advanced Enquiry for Midwifery Practice	DEGCLO1, DEGCLO3, DEGCLO4, DEGCLO5, DEGCLO6, DEGCLO7, ORDCLO1, ORDCLO2, ORDCLO3, ORDCLO4, ORDCLO5
6MI018	Advanced Clinical Practice	DEGCLO1, DEGCLO2, DEGCLO3, DEGCLO4, DEGCLO5, DEGCLO6, DEGCLO7, ORDCLO1, ORDCLO2, ORDCLO4, ORDCLO5, ORDCLO6
6MI019	Advanced Professional Midwifery	DEGCLO1, DEGCLO3, DEGCLO4, DEGCLO5, DEGCLO6, DEGCLO7, ORDCLO1, ORDCLO2, ORDCLO3, ORDCLO4, ORDCLO5

Teaching, Learning and Assessment:

In a healthcare system driven by an increasing demand for clinical leaders with advanced critical thinking and research skills it is essential that all staff are equipped with a wide range of transferable skills and the ability to recognise and actively pursue their own learning and development needs. With that in mind, our approach to learning and teaching within our midwifery pre-registration programme supports you to explore and assess your own strengths and weaknesses and encourages you to manage your own learning. Importance is placed on enhancing your ability to contextualise and apply your developing knowledge to your broader practice experiences and on-going learning. The range of teaching and learning strategies employed will provide you with opportunities to achieve the learning outcomes for the course and develop your intellectual skills through lectures, theme days, seminar discussions and scenario based learning. Opportunities for inter-professional collaboration are embedded across the curriculum to enable you to understand the contribution of other professionals to patient/service-user care and promote the development of team-working skills.

During your programme you will have access to our state-of-the-art simulation facilities where you will be able to experience clinical scenarios and practise skills in a safe environment. This includes simulated in-hospital, home and community environments and our human-patient simulators will allow you to hone your skills, supported by experienced practitioners to guide you. The latest technology is embedded into our skills and simulation environments, including the use of a state of the art virtual dissection table which allows 3D images of human anatomy and diseases to come alive to support your learning. We also use an integrated learning and teaching audio visual recording system called "Panopto" which links to the University's virtual learning environment and allows you to record, upload and review footage of your practice in the simulated environment.

Flexible learning is promoted through regular, self-managed activities where independent study and the use of the virtual learning environment (Canvas) support and consolidate taught theory to broaden your knowledge and understanding of the subject. In the first year you will be introduced to the information technology, library search skills, self-assessment and reflection strategies that build the foundations of lifelong learning. Alongside this you will begin to develop enquiry and research skills and explore the meaning of professional practice and leadership, concepts developed throughout your programme. Caseloading provides you with an excellent opportunity to consolidate your theoretical and practice learning and clinical reasoning by providing continuity of care to a group of women throughout their perinatal experience.

Our new curriculum has been designed to align with the University of Wolverhampton [Learning and Teaching Strategy](#) in enabling you to achieve your full learning potential through being empowered and inspired. The curriculum is designed to be inclusive and flexible, to meet the needs of a diverse student community. You will develop and enhance ongoing skills in relation to employability, enterprise, entrepreneurship, professional practice, sustainability and global citizenship through learning that is informed by evidence-based research, practice and innovation. Further to this, completion of the programme will enable you to

achieve our graduate attributes of digital literacy, global citizenship and be knowledgeable and enterprising.

The following data expresses the proportion of time in each year of study that students can expect to engage in the following activities (expressed as a percentage)

Placement Learning

Students spend 50% of their activity in the practice environment and the value and importance of practice learning is emphasised by the attribution of credits for practice. Your practice supervisor and practice assessor have received additional post-registration training to ensure they are able to maintain, support and assess your practice as required by the NMC (2018). Members of the midwifery team also have a regular presence in the clinical settings supporting and updating practice supervisors and assessors. Practice placements may be located in a broad range of National Health Service trust hospitals, birth centres and community settings which provide you with a range of experiences to support your learning and development. All placement settings are subject to regular educational audit and review to ensure they maintain and develop an optimum learning environment for students to achieve their standards of competency, supported by a sufficient numbers of supervisors and assessors.

Whilst you are in practice, you will engage in sessions at the university to develop critical reflective skills that enable you to draw upon your practice experiences and link this to the theoretical modules. This ensures that there is a continual relationship between your understandings of theory in relation to your practice.

Specific information relating to your course will be available in your placement handbook

Assessment

The primary purpose of assessment is to enable you to demonstrate achievement of the learning outcomes and ensure the maintenance of academic and professional standards. The assessment strategy enables you to meet the statutory requirements leading to eligibility for professional registration and the academic requirements leading to the Award of BMid (Hons).

The ways in which you will be assessed at the University of Wolverhampton will:

- allow you to demonstrate that you have met the learning outcomes of your course and modules;
- enable you to reflect on your performance, following timely, meaningful and useful feedback;
- encourage you to identify your strengths and weaknesses so that the level of achievement can be measured and recorded.

The assessment strategy has been designed to reflect the spiral nature of your learning experiences and assessments will focus on the integration of subject knowledge with theory and practice. Over the course of your studies you will be assessed in different ways which will be relevant to your subject area. You will be assessed (both formatively and summatively) using a wide variety of assessment types including essays, exams, practical work, research exercises, case studies, presentations, seminars, reflections, formative blended learning exercises and online collaborations

There are two types of assessment you will encounter throughout the course:-

- Formative - the marks and grades for these assessment activities do not contribute towards the module mark and grade. Formative assessment activities are useful to provide you with comments to let you know how you are doing. Sometimes the format of a formative assessment activity will be similar to the summative assessment activity for the module, in order to prepare you and ensure that you are familiar with the summative assessment task
- Summative - assessment activities where the mark you receive will contribute towards the final mark for your modules

Feedback / feed forward:

Feedback and feedforward are an integral part of teaching and learning and are crucial elements in supporting your learning experience. Feedback and feedforward will have maximum impact on your learning when they are viewed as dialogic processes in which both staff and students participate. There are therefore expectations and activities that apply to both teaching staff and students in this regard.

Feedback and feedforward are any information, processes or activities that prompt you to pro-actively reflect upon your academic performance and consider the academic expectations of the module/course. Feedback focuses specifically on current performance and corrections after an assessment is completed whilst feedforward concentrates on improvement and preparation for the next assessment. Feedback and feedforward can often occur simultaneously. An important part of the feedback process is the use of feedback to identify strengths and weaknesses, to explain why or how a mark has been awarded, to debate different ideas, to suggest alternatives and to provide an opportunity to develop. Feedback on summative assessments

(assessments which are graded) will be clearly aligned to a final mark. Feedforward advises on how to be successful in future work. Feedback and feedforward on formative assessments (assessments which do not contribute to the module mark) are particularly important as they will allow you to develop skills, monitor your learning, identify your strengths and weaknesses and improve your work, before a final mark is awarded.

Progression in Higher Education

Students enter higher education with different abilities and levels of knowledge. An inclusive assessment approach has been embedded into the course whereby a variety of assessment methods are used, some of which offer students options in relation to the assessment approach taken, such as verbal or written reflection opportunities or optionality within assessment (such as a choice of case study). Inclusivity in this way allows you to draw on your strengths to demonstrate your knowledge and understanding.

Assessment throughout the three years is cumulative and incremental enabling you to build self-confidence and orientate you to university life and learning with others. At academic level 4 you will be typically asked to discuss, demonstrate, explain and identify. At academic level 5 you may be asked to recognise, demonstrate, respond, justify, apply, critically discuss and evaluate. At academic level 6 you will typically be asked to construct, critically evaluate, develop, appraise and synthesise.

The culmination of the programme for you is your advanced independent inquiry module in which you should demonstrate your ability to devise and sustain arguments or solve problems, have a systematic understanding of the key aspects of midwifery, critically analyse and use enquiry (QAA, 2018). You will be able to demonstrate research skills and demonstrate high level academic skills and digital literacy together with a command of theory and knowledge of contemporary midwifery practice.

Assessment of practice

There are different parts to your assessment in practice, each part aligns to a full-time year of study and has its own practice assessment document (MYE PAD).

The MYEPAD makes up a significant part of the overall programme assessment. Continuous assessment is an integral aspect of assessment in practice and you are expected to show evidence of consistent achievement. You should engage positively in all learning opportunities, take responsibility for your own learning and know how to access support. You will work with and receive written feedback from a range of staff including practice supervisors and practice assessors and they are required to reflect on your learning.

The ongoing achievement record (OAR) is a separate document that summarises your achievements in each placement and with the main document provides a comprehensive record of your professional development and performance in practice. This will be reviewed at the end of each part of the course.

(please note that we are awaiting release of the final, national MYEPAD, and the above section may need to be amended to reflect the final document)

The safe administrations of medicines

The safe administrations of medicines will be underpinned by the use of "SafeMedicate", an electronic package designed to support knowledge and skills around the safe interpretation of prescriptions, dosage calculations and correct administration routes. This will be launched at the beginning of your course and is embedded in identified modules in every year. You will have regular opportunities for incremental formative assessments in health numeracy assessment, and you will have opportunities to undertake the practical skills of medication safety and administration in a dedicated skills laboratory setting before further implementing these skills in practice under the direct supervision of a registered practitioner. By the end of the course you must achieve 100% in your final safe medicate summative assessment in order to successfully complete the programme

Practice supervisor responsibilities (registered nurse/midwife or other registered health/social care professional)

In many practice areas you will be supported by a number of practice supervisors. Some areas may adopt a team based approach due to the nature of the experience.

Your practice supervisor has an important role in supporting and guiding you through your learning experience to ensure safe and effective learning. This includes facilitating learning opportunities including any reasonable adjustments you may need to get maximum benefit from the placement. It is the practice supervisor's responsibility to contribute to your assessment through the recording of regular feedback on your progress towards, and achievement of the proficiencies. Specific feedback must be provided by the practice supervisor to the practice assessor on your progress.

Supervision in other placement areas (i.e. those areas where there are no health/social care registrants)

A range of staff can support your learning and play a vital role in your learning and development. On placements where specific NMC proficiencies are not being assessed a range of staff members are encouraged to support learning and can provide you with feedback within your practice documentation.

Practice assessor responsibilities

Your practice assessor plays a key role in assessing and confirming your proficiency providing assurance of your achievements and competence. This includes facilitating learning opportunities including any reasonable adjustments you may need to get maximum benefit from the placement. They will observe you, conduct and record your assessments informed by your reflections, feedback from practice supervisors and other relevant people to confirm achievement. They will liaise with the academic assessor scheduling communication at relevant points.

There are numerous elements to be assessed in practice. One or more practice supervisors can contribute to the assessment of some of the proficiencies in discussion with the practice assessor, but the practice supervisor must be working in their scope of practice.

When assessing your proficiency, practice assessors will take into account the sources of evidence that underpin your knowledge and skills and the views of those receiving care. Comments should acknowledge those exceptional students who are exceeding expectations for their stage in practice or who have particularly commendable attitudes, behaviours, knowledge or skills.

Academic assessor responsibilities

Academic assessors have a key role in confirming your progress, recording objective, evidence-based decisions on conduct, proficiency and achievement and make recommendations for progression providing assurance of your achievements and competence. The academic assessor, for each part of the PAD, will have an understanding of your learning and achievement in practice, through working in partnership with the practice assessor to gather feedback regarding achievement and progression.

As you progress through your course you will be expected to take on more responsibility within your practice placements. This will enable you to develop confidence and skills in your work as a member of the midwifery / multidisciplinary team.

Throughout your practice placement learning you will be expected to conduct yourself in a professional manner at all times. We will provide guidance and information on the requirements regarding professional conduct to help you understand how to manage learning in the complex and sometimes unpredictable world of healthcare.

Further information related to your practice learning experience can be found in the practice handbook.

To qualify for the award of an Honours Degree, students must complete all course requirements and pass all modules

Assessment Methods:

At the University of Wolverhampton, a variety of modes of assessment will be used to support and test your learning and progress and to help you develop capabilities that are valued beyond your University studies and into your working life. Your course may include a variety of assessment activities:

Written examinations (including online examinations, open and closed book examinations and quizzes)
Coursework (for example, essays, reports, portfolios, project proposals and briefs, CVs, poster presentation)
Practical (for example, oral and video presentations, laboratory work, performances, practical skills assessment)

In the final year of your undergraduate degree, and at the end of your postgraduate degree, you are likely to be expected to write an extended piece of work or research, such as a dissertation or a practice-based piece of research.

Student Support:

Support for Students – University Library

Our [Libraries](#) combine traditional library services with [IT](#) facilities to focus on the ways students choose to study. There is a Library on each campus, with 24/7 access provided during peak times of the year at Wolverhampton and Walsall. Each Library provides subject-specific book and journal resources, as well as diverse study environments including IT suites and group/single study rooms. In addition to our physical stock, the University Library provide access to over 8,000 full text electronic journals, 100 online databases and e-book versions of all reading list titles where available. Our [online services](#) are available both on and off campus. Our Library staff provide day to day support to students, and our [ASSIST](#) online chat service operates on a 24/7 basis. Our [Skills for Learning](#) service helps students to develop the skills required for successful academic study, including; Academic, Information and Research Skills. Students can access workshops and drop-in sessions facilitated by experienced learning

support staff, as well as appointment slots including via Skype. Workshops can also be run as part of modules, at the request of tutors. Further support is provided by online skills resources including guides, tip sheets, and interactive materials and each Library has a designated collection of study skills books.

The Student Support and Wellbeing webpages, located below

<https://www.wlv.ac.uk/current-students/student-support/student-support-and-wellbeing-ssw/>

offers students advice on a variety of matters linked to their Health and Wellbeing.

Please [contact the Team](#) to:

- discuss disability or specific learning difficulty support
- access advice and support for a mental health condition
- access information about supporting your mental health and wellbeing
- connect with our Chaplaincy service
- seek advice on funding and financial support
- seek advice as a [D/deaf or hearing impaired student](#)

Course Specific Support

Student Advisors

<https://www.wlv.ac.uk/about-us/our-schools-and-institutes/faculty-of-education-health-and-wellbeing/fehw-student-services/>

There are student advisors within the Faculty of Education Health, and Wellbeing. They are here to support you in a professional and confidential way by either resolving or referring your query to one of our many professional services within the University. The student advisors work closely with the various support networks within the University and are supported by our graduate interns. Please see the points below for some examples of their support.

- Sign posting to Support and Wellbeing Services
- Support with progression
- Advice on extensions and extenuating circumstances claims
- Support students with attainment and retention

Advisors and interns can be contacted via email (FEHWstudentservices@wlv.ac.uk).

Personal Tutors

You will be allocated a personal tutor at the start of your course with whom you will build and develop a relationship to help you work towards achieving the course learning outcomes. Your personal tutor will meet with you on a regular basis (at least three times per academic year) in order to offer support, identify if you are making satisfactory progress and to offer support if you are at risk of withdrawal. Your personal tutor will assist you in your personal and academic development, planning and progression as well as helping you liaise with other staff and support facilities in their Faculty and the wider University. You can find out who your personal tutor is by visiting [e:Vision](#).

Module leaders

Your module leaders are your first point of contact for everything module related whether that's help with a particular part of the module or advice on how to complete the assessment. Module leaders will usually be able to schedule a meeting with you via phone, WebEx or Skype. A list of module leaders is available in your [Course Guides](#), along with their contact details.

Course leaders

The course leader has overall responsibility for your course and the enrolled students. They monitor the quality of the course through course committees which collect feedback from staff and students. They manage the academic programme of study and are responsible for reporting any issues raised and examples of good practice.

Student Enabling Tutors

The Faculty Student Enabling Tutor (FSET) liaises with the Student Support and Wellbeing (SSW) department regarding provision for specific disabilities and disseminates information from the SSW on any identified learning needs. The FSET monitors requests for, and provision of, specific examination and assessment arrangements. The FSET takes a pro-active role in monitoring the welfare and academic progress of disabled students within the school.

Academic Coaches

Academic Coaches are responsible for supporting students' transition into higher education at undergraduate level. This includes coaching and provision of high-quality support, guidance and feedback for all students enrolled on relevant programmes in the Faculty. This will focus on providing students with academic support and pastoral care, to improve engagement and facilitate independent learning, while gaining transferable skills for future employment. ACs liaise with academic staff, providing referrals for students with issues and acting as a follow up with students about whom academic staff may have concerns.

Working in partnership with you

The University and the Student's Union take deliberate steps to engage all students, individually and collectively, as partners in the assurance and enhancement of their educational experience. Our student charter sets out what you are expected to give and what you gain by involving yourself in as much as possible. All of our support mechanisms are enshrined in the Student Charter:- <https://www.wlv.ac.uk/about-us/student-charter/>

Employability in the Curriculum:

Midwives make a unique contribution to the health and well-being of mothers during one of life's most important events and work in a variety of settings including women's homes, birth centres, clinics and hospitals and provide the women with majority of their care throughout pregnancy, labour and the postnatal period. Our programmes are designed to enable you to develop the necessary competencies to practice safely and confidently as a registered midwife.

The course will assist you to develop a strong professional identity and to be confident in demonstrating key employability skills such as being self-directed in your learning, having the ability to problem solve and to think critically. These are all qualities that are essential for providing expert, evidence-based care and will make you highly employable. Immediate career prospects are excellent for newly qualified midwives and most of our graduates take up employment within the NHS.

Midwives may choose to continue to develop as expert clinicians or develop careers in service management, research, education or public health. The increased focus on leadership and public health within the new curriculum, alongside core areas of audit, research and improvement offers a broad range of post-qualifying opportunities

You may also be able to work in certain countries overseas, as midwifery education in the UK is well respected around the world.

During your course you can access the support of an employability champion within the Faculty who helps to develop a dedicated programme of events designed to help you build new skills and boost your employability. This takes the form of the Career Development Week each year and comes with a packed programme of events, courses, workshops, trips and activities. The aim is to help you add to your CV and own personal development and in turn helping your job prospects.

Further training and education opportunities:

In addition to a wide range of exciting jobs and careers, you will also be required to undertake continuing professional development in order to maintain your midwifery registration. http://www.opsi.gov.uk/si/si2002/ukxi_20020253_en.pdf. Every three years following registration, you will be required to go through a period of revalidation, demonstrating how you have maintained skills, developed knowledge and practiced safely and effectively over the preceding three years.

<http://revalidation.nmc.org.uk/welcome-to-revalidation/index.html>.

This life-long learning approach is critical to the maintenance of safe and effective care for women and their families.

More information is available from Revalidation: How to revalidate with the NMC (NMC 2017), which includes details of the NMC requirements for nurses and midwives to demonstrate how each nurse or midwife has kept his or her knowledge and skills up to date. You can continue with further study and research in the Faculty of Education, Health and Wellbeing where we currently offer a wide range of post graduate courses in health and wellbeing. These include post-graduate certificates, post-graduate diplomas, masters and doctoral degrees. The post-graduate courses are highly flexible, work-based and have been designed with health and social care employers to ensure that your studies will be related to the key current and future issues for health and social care provision. Courses can be studied full or part-time and you may be eligible for some support from your employer to undertake certain courses related to your job.

We also offer short professional development courses either to meet a specific requirement or to provide you with a 'taster' of the longer courses
