## Entry Requirements:

---

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS)

- You must have current NMC registration.
- For the BSc (Hons) you must have 120 credits at level 4 (certificate) and 120 credits at level 5 (diploma).
- Applicants should apply direct to the University and if seeking support from an employer should agree this in advance of an application.

## Distinctive Features of the Course:

---

The aim of this course is to enable you to build on previous studies to gain an Honours degree in Nursing Studies. We have both your current and future career development aims in mind, and the course offers a unique opportunity to explore contemporary issues in nursing practice. By improving your own effectiveness you can begin to improve the effectiveness of those within your sphere of influence and enhance your employability.

The health service is a dynamic and challenging environment in which to work and time for continuing professional development and academic study is limited. The flexible course delivery enables you to continue in practice whilst benefitting from part-time and evening study.

The course allows you to tailor your studies to reflect your individual learning needs and career aspirations. This is reflected in the design of the course which allows you to select option modules according to your needs.

Service improvement is a strong theme throughout the course: your studies will encourage you to adopt an enquiring attitude to established practice in order to ensure that service users and their carers get the best service and the best health outcomes possible.

## Educational Aims of the Course:

---

This programme will cover a variety of skills important for your development as a qualified nurse, in a way which helps you to bring together theory and practice.

As a graduate nurse you will reflect a knowledgeable and enterprising approach to healthcare and adopt a critical, analytical and imaginative approach to your nursing practice.

## Teaching, Learning and Assessment:

As part of your studies you will come into contact with a range of activities designed to promote and enhance your learning experience. Our use of blended learning activities encourages you to identify and address particular learning needs related to your practice.

Formal learning - we promote a blended approach to learning; some core content will be delivered in the 'face to face' traditional teaching style but will include interactive activities to challenge your knowledge and practice.

Applying theory to practice – we use a variety of approaches to enhance your ability to evaluate, articulate and apply evidence to inform practice e.g. critiquing of journal articles, informal presentation and case studies, and skills in summarising of key research in order to develop and disseminate to the healthcare team. You will make use of a range of electronic resources to investigate the influence and impact of global healthcare communities on national and local policy.

Research skills –you will be supported in the preparation of a detailed evidence based intervention or research proposal which will develop and expand your theoretical and practical knowledge of the research process.

Computer based learning - the integration of computer based technology, directed studies and traditional teaching can enhance the quality and efficiency of your learning experience. You will be encouraged to access electronic learning resources within both University and the healthcare environment, including the use of e-mail and discussion forums to communicate with fellow professionals in the learning community and develop your personal and professional values.

The ability to use digital resources and equipment is a key attribute of a graduate nurse and reflects the need for the healthcare worker to use advanced technologies in areas such as record keeping, delivery and management of care.

Workplace learning – we hope that as you develop graduate skills during your course, you will be able to apply your learning to your normal activities in the practice setting. You will be able to reflect on personal and professional learning, the development of knowledge and skills and identify strategies to develop nursing care in the future.

## Student Support:

---

### Generic learning support

We offer a variety of learning resources to help you progress; the learning centre services provide a range of student focused activities and resources that enable you to find sources of evidence and reference them correctly and efficiently. The learning centre is staffed by a team with considerable experience in supporting students and has key individuals identified with expertise in the Health and Wellbeing subject area.

'ASSIST' – this is an online service if you need to ask anything or chat to a member of staff about problems finding resources or information.

'Sharpen up your skills' – this is a great resource for you to enhance your study, it offers a range of advice from basic IT skills, to essay writing and preparing for examinations, to personal development planning. Accessible via the website

<http://asp.wlv.ac.uk/Level2.asp?UserType=11&Section=&Subsection=547>

IT Support Services - provides on-line and telephone support for any IT difficulties you may encounter whether at home or on campus.

### Student Support Officers

The School of Health and Wellbeing has student advisors to offer help and advice on a range of issues that may be affecting your studies. Accessible by telephone, email FEHWSupport@wlv.ac.uk, twitter @FEHW\_support or website <http://www.wlv.ac.uk/fehw/studentadvisors>

### Personal Tutors

You will be allocated a personal tutor at the start of your course with whom you will build and develop a

relationship. Your personal tutor will maintain communication with you (and you with them) as you progress through to completion of your course.

### Employability in the Curriculum:

---

The impact of recent change and modernisation on the health services has inevitably affected the management of care. Many nurses will need to be able to work across a variety of health and social care settings and manage large patient groups with co-morbidities. This is reflected in the flexibility of the course.

Since the move to an all-graduate profession, it has become more important than ever to recognise the impact that higher education for nurses can have in the practice setting. This course will provide you with an opportunity to enhance your academic skills and provide access to study at Masters level e.g. MSc in Nursing.
